RE: Possible Sample Station Sabotage In Herculaneum

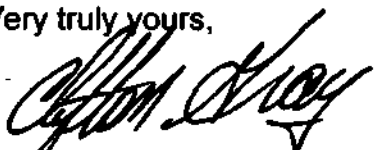

Dear Mr. Petruska:

The Doe Run Company has become aware and concerned about the possibility of sabotage to samplers that the EPA has placed along the haul roads.

We are requesting that you look into the possibility of placing high technology day/night cameras at the Methodist church and at the Main Street and School Street sampling stations. This would ensure that there is no possibility of tampering or salting the sample stations.

We will assist you in any way possible in your evaluation or installation.

Very truly yours,

Clif Gray, General Manager
The Doe Run Company
Herculaneum Smelting Division
